**Müller-BBM Cert
Umweltgutachter GmbH**

Independent auditor for verification of this certificate and the associated calculation principle

* Includes CO₂-equivalents from production, transport and distribution of the fuel; from combustion CO₂ is included, other substances are excluded

** SAF counter indicates the fraction of the batch allocated to the certificate when numbering each kilogram of SAF in the batch consecutively.

Calculation based on:

Default TTW emission factor fossil fuel and heating value acc. to ISO 14083; density acc. to supplier information or ISO 14083 if not available; default WTW emission factor fossil fuel acc. to GLEC 3.1; actual WTW emission factor SAF acc. to Proof of Sustainability
